Day 10 – File Permissions & File Operations Challenge

Task

Master file permissions and basic file operations in Linux.

- Create and read files using `touch` , `cat` , `vim`
- Understand and modify permissions using `chmod`

Expected Output

- A markdown file: `day-10-file-permissions.md`

- Screenshots showing permission changes

🔗 Challenge Tasks

Task 1: Create Files (10 minutes)

1. Create empty file `devops.txt` using `touch`
2. Create `notes.txt` with some content using `cat` or `echo`
3. Create `script.sh` using `vim` with content: `echo "Hello DevOps"`

Verify: `ls -l` to see permissions

Task 2: Read Files (10 minutes)

1. Read `notes.txt` using `cat`
2. View `script.sh` in vim read-only mode
3. Display first 5 lines of `/etc/passwd` using `head`
4. Display last 5 lines of `/etc/passwd` using `tail`

Task 3: Understand Permissions (10 minutes)

Format: `rw-rw-rw-` (owner-group-others)

- `r` = read (4), `w` = write (2), `x` = execute (1)

Check your files: `ls -l devops.txt notes.txt script.sh`

Answer: What are current permissions? Who can read/write/execute?

Task 4: Modify Permissions (20 minutes)

1. Make `script.sh` executable → run it with `./script.sh`
2. Set `devops.txt` to read-only (remove write for all)
3. Set `notes.txt` to `640` (owner: rw, group: r, others: none)
4. Create directory `project/` with permissions `755`

Verify: `ls -l` after each change

Task 5: Test Permissions (10 minutes)

1. Try writing to a read-only file - what happens?
2. Try executing a file without execute permission
3. Document the error messages

Hints

- Create: `touch` , `cat > file` , `vim file`
- Read: `cat` , `head -n` , `tail -n`
- Permissions: `chmod +x` , `chmod -w` , `chmod 755`

Documentation

Create `day-10-file-permissions.md` :

Day 10 Challenge

Files Created

[list files]

Permission Changes

[before/after for each file]

Commands Used

[your commands]

What I Learned

[3 key points]

Submission

1. Navigate to `2026/day-10/` folder
2. Add `day-10-file-permissions.md` with screenshots
3. Commit and push

Learn in Public
